

We invite the first 20 cleaner members that renew their 2017 membership, to tour the leading manufacturer of high end work stations and upholstered items used in commercial sites.

Join us for a tour of the manufacturing process and review of the fabrics and materials that go into the products.

Teknion uses a variety of fabrics in their construction process, including wool, and special consideration is required in the cleaning process.

A wine and cheese social will follow the tour.

A maximum of 4 participants per company (additional limits may apply depending on demand)

This event is complimentary with your paid membership for 2017. If you already renewed for 2017 please accept our thanks and you are still eligible for this tour.
