Hazmat Technician Level Training NFPA 472

Hazardous Materials Technicians are those who respond to releases or potential releases of hazardous materials for the purpose of CONTROLLING the release. They are expected to use SPECIALIZED chemical-protective clothing and SPECIALIZED control equipment. Our instructors have extensive experience dealing with actual HazMat incidents and will give your staff insight and training they can't get anywhere else. Training is performed by members who deal with emergency response on an ongoing basis. The lead instructor for this course had 33-year career with The City of Mississauga Fire and Emergency Services, he specializes in Hazardous Materials Response & training. Our course is tailored to suit disaster restorers and includes allot of comprehensive hands-on training, not just theory.

Key components in this course include but not limited to ...

- Regulations and Standards
- Response Levels
- Analyzing the Incident
- Identification and Classification
- Air Monitoring Equipment and Techniques
- Information Sources and Interpretation of Data
- Containers assessment
- Tank Car response
- Grounding and Bonding
- Rescue considerations
- Response Planning
- Personal Protective Clothing Selection
- Respirator Selection
- Vapour Suppression
- Decontamination
- Site Safety Plans
- Incident Management System
- Field Exercises
